

INSIGHTSTREAM: NAVIGATE THE NEWS APP

1.INTRODUCTION

- **Project title:** News app
- **Team members:**
 - 1) Nancy R (Team leader) Email id:(nancy_ranjithkumar2005@gmail.com)
 - 2) Priyadharshini D Email id:(pd587022@gmail.com)
 - 3) Raichel P R Email id:(rovjose1403@gmail.com)
 - 4) Raveena M Email id:(m.raveena2004@gmail.com)

2.PROJECT OVERVIEW

Purpose

The primary goal of Insight Stream is to **simplify news consumption** by providing users with an **interactive and dynamic** platform where they can access the latest news across multiple categories. The application ensures **seamless navigation**, **efficient news discovery**, and **personalized content access**.

Features

- **Live News Updates** – Fetches news from APIs in real-time.
- **Categorized News** – Organized sections for Politics, Sports, Tech, etc.
- **Search Functionality** – Allows users to find specific news articles.
- **Trending Section** – Displays the most viewed and shared articles.
- **Newsletter Subscription** – Users can subscribe for daily updates.
- **User Authentication (Future Enhancement)** – Login system for personalized news feeds.

3.ARCHITECTURE

Component Structure

The application follows a **component-based architecture**, ensuring code reusability and maintainability.

Key Components

- **Navbar** – Contains search bar and category navigation.
- **Hero Section** – Highlights trending news.
- **Category Page** – Displays news articles based on selected categories.
- **Article Page** – Shows full article details and related articles.
- **Footer** – Contains links and subscription options.

State Management

- **React Context API** – Manages global state (user preferences, selected categories).
- **use State & use Effect Hooks** – Handles dynamic updates and API calls.

Routing

Implemented using **React Router** for navigation between pages.

- `/` – Home Page
- `/category/:name` – Category-wise news page
- `/search/:query` – Search results page
- `/article/:id` – Full article page

4. SETUP INSTRUCTIONS

Prerequisites

- Install **Node.js & npm**: [Download Here](#)
- Install **Git**: [Download Here](#)
- Install **React.js**:

```
npm create-react-app news-app
```

- `cd news-app`

Installation

1. **Clone the Repository**
 2. `git clone:`
 3. **N: Project Directory**
 4. `cd news-app-react`
 5. **Install Dependencies**
 6. `npm install`
 7. **Start the Development Server**
 8. `npm start`
 9. Open <http://localhost:3000/> in the browser.
-

5. FOLDER STRUCTURE

Client

- `news-app/`
- `public/` – Static assets
- `src/`
 - `components/` – Reusable UI components
 - `pages/` – Page components
 - `context/` – State management using Context API
 - `styles/` – CSS & Styling files
 - `App.js` – Main application component
 - `index.js` – Entry point
- `package.json` – Dependencies
- `README.md` – Documentation

Utilities

- Common helper functions for **API calls, data formatting, and state management.**
-

6. Running the Application

Frontend

1. Navigate to the project directory:
 2. `cd news-app`
 3. Install dependencies:
 4. `npm install`
 5. Start the React app:
 6. `npm start`
 7. Open `http://localhost:3000/` in a browser.
-

7. Component Documentation

Key Components

- **Navbar** – Handles navigation and search.
- **Hero Section** – Displays trending news.
- **Category Page** – Shows news articles per category.
- **Article Page** – Displays the full news article.
- **Footer** – Contains additional links and social media.

Reusable Components

- **News Card** – Reusable component for displaying news items.
- **Search Bar** – Allows users to search for news articles.

8.STATE MANAGEMENT

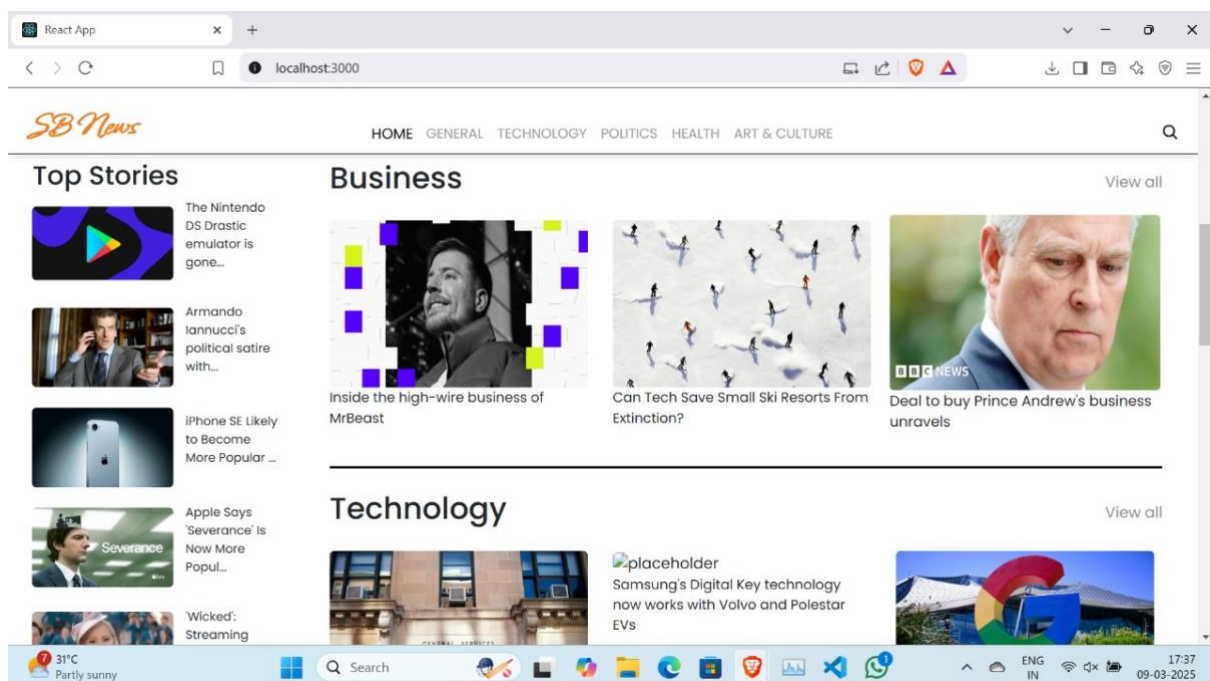

Global State

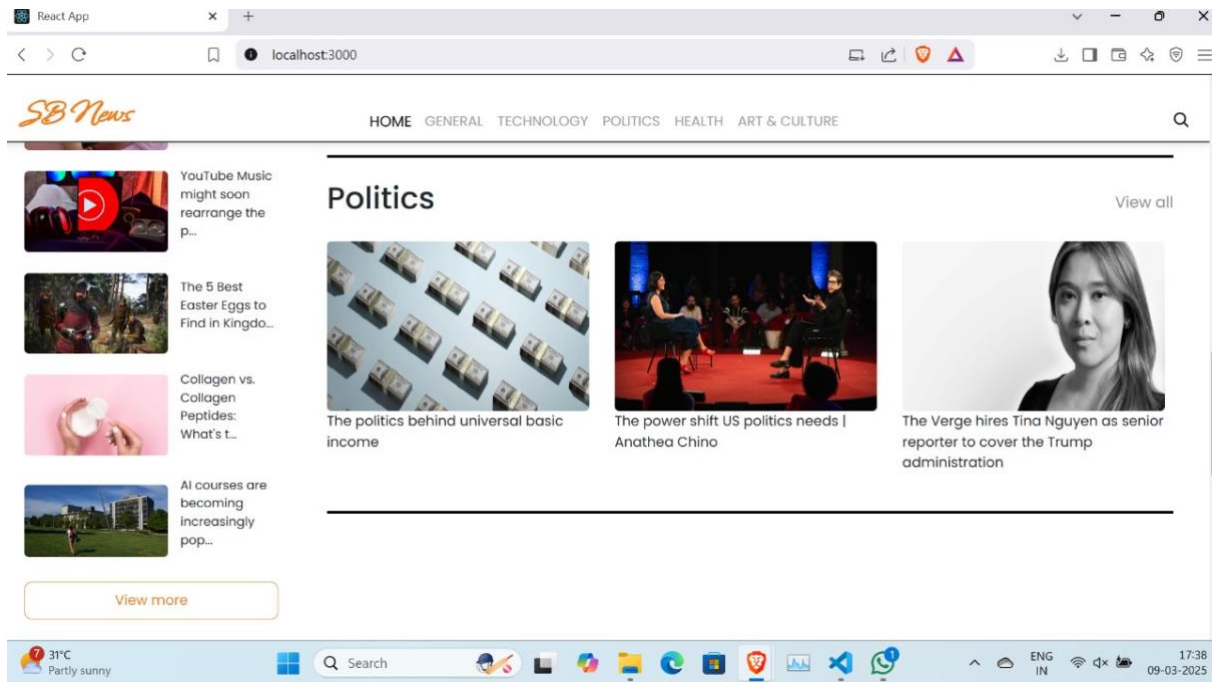

Managed using **React Context API**, ensuring consistent data across components.

Local State

Handled using **use State** for managing user inputs, search queries, and filters.

9.SCREENSHOT

10.STYLING

CSS Frameworks/Libraries

- **Tailwind CSS / Bootstrap** for responsive design and faster styling.
- **Custom CSS Modules** for unique styling needs.

Theming

- **Light & Dark Mode (Future Enhancement)** – User-selectable themes.

11. TESTING

Testing Strategy

- **Unit Testing** – Using Jest & React Testing Library.
- **Integration Testing** – API call validation with mock services.
- **UI Testing** – Checking responsiveness across devices.

Code Coverage

- Ensure **80%+ test coverage** for components and functions.
-

12. KNOWN ISSUES

- **API Rate Limit** – Free API key has request limitations.
 - **No User Authentication** – Users cannot save favourite articles.
 - **Limited Filtering** – Need better filtering for news searches.
-

13. FUTURE ENHANCEMENT

Future Features

- **User Authentication** – Allow users to create accounts and save news articles.
 - **Dark Mode** – Provide an option for users to switch themes.
 - **Push Notifications** – Notify users about breaking news.
 - **AI-Based News Summarization** – Implement AI for article summaries.
 - **Offline Mode** – Cache recent news for offline access.
-

Project Links

- **Live Demo:** [Project Demo](#)
 - **Code Repository:** [GitHub Repo](#)
-

CONCLUSION

Insight Stream is a **modern, scalable, and feature-rich** news app designed for **real-time news consumption**. While it currently provides **API-based news updates and category-based browsing**, future enhancements will focus on **user personalization, authentication, and AI-powered features** to improve the user experience.
